PGC 4000v2 Power Generation Controller

Introducing New V2 Features:

- **Industry Leading Technology (1Gbps LAN Network Speed Capability)**
- **10-15 Times More Processing Power = Future Feature Expansion Capability**
- **PC Based Peripherals for Easier Service Support (USB/ETHERNET)**
- **Visual PGC HMI - Windows 7 Compliant**
- **Dual Ethernet Ports**
- **32 Digital Inputs (Includes 8 New Inputs on PGC 4000v2)**
- **24 Digital Relay Outputs (Includes 8 New Outputs on PGC 4000v2)ital Inputs (Includes 8 New Inputs on PGC 4000v2)**
- **Pulse Width Modulated (PWM) Governor Output**
- **Backward compatibility**

Power Metering (Utility & Generator)
Protective Relaying (Utility & Generator)
Auto Synchronizers (Utility & Generator)
Gen kW & kVAR Load Sharing
Engine Controller
Programmable Logic
Remote Communication
